

## **Migratory Birds**

**Resident Birds** 

Travel long distances

Move seasonally

Migrate to areas where food is more abundant

Adapt to multiple habitats

Examples: Swallows, Geese

Need food, shelter, water

Raise young

Face predators

Stay in one region year-round

Rely on local food sources

Adapt to local conditions

Can change diet according to the availability

May visit birdfeeders

Example: Robins, Cardinals, Chickadees, Finches
